PROFESSIONAL SUMMARY

Software Engineer with 3+ years building full-stack features for a compliance and risk-management SaaS platform, from architecting React.js/Node.js modules used by regulated clients to cutting audit-prep time by 40% and page load times by 35%. Comfortable owning a module end-to-end: requirements, implementation, code review, and mentoring newer engineers.

TECHNICAL SKILLS

- **Frontend:** React.js, Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Hooks, WebSockets
- **Backend:** Node.js, Express.js, MongoDB, Mongoose, Prisma ORM, REST APIs, JWT Authentication
- **Cloud & Tools:** AWS SDK, Amazon Bedrock, Git, GitHub, Jenkins, Jira, Postman, Axios, VS Code
- **Competencies:** Micro-Frontend Architecture, State Management, Performance Optimization, Code Reviews, Agile/Scrum

WORK EXPERIENCE

Akitra — Cybersecurity & Compliance SaaS

Software Engineer

Trainee Software Engineer

Remote

October 2023 - Present

April 2023 - September 2023

- Led end-to-end delivery of the **CAPA module** — audit documentation, root cause analysis, and corrective action workflows — cutting audit preparation time by **40%** with full traceability across 50+ artifacts.
- Owned the **FDA 510(k) Submission Management module**, enabling full traceability across 100+ risk categories for regulated compliance clients.
- Built the **Requirements Management module** linking requirements, test cases, and compliance artifacts; adopted by **5+ cross-functional teams** within one quarter of launch.
- Architected reusable **React.js micro-frontend components**, reducing feature delivery time by **25%**; lazy loading and code splitting achieved **35% faster load times** and **28% smaller bundle size**.
- Managed global state with **Redux Toolkit** across 10+ workflows; integrated RESTful APIs with Axios ensuring secure, validated data flow.
- Mentored junior engineers and led Agile/Scrum sprint planning for a team of 8+, maintaining **95%+ on-time delivery** across 6 production releases.

PROJECTS

Real-Time Chat Application

React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT

- Architected a messaging platform using **Socket.IO** supporting **500+ concurrent connections** with sub-100ms delivery latency.
- Engineered Node.js/Express.js backend with indexed MongoDB for persistent chat history and secure JWT authentication.
- Optimized React.js frontend with `useMemo/useCallback`; implemented presence detection and real-time typing indicators.

AI Resume Builder — Backend Service

TypeScript, Node.js, Express.js, Google Gemini API

- Built a Node.js/Express.js REST API in TypeScript that generates tailored professional summaries and resume bullet points from user-provided experience data.
- Integrated the **Google Gemini API** to transform raw input into polished, role-specific resume content, including prompt design and response parsing.
- Architected the service as a standalone API layer, decoupled from any client, to support a planned React.js frontend and turn this into a full-stack product.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science

Birla Institute of Applied Sciences

2018 - 2022

Uttarakhand, India

Languages: English (Fluent) | Hindi (Native)
